**Corporate governance principles:** All divisions and the umbrella organisation as well as the research organisations are obligated to comply with them. These include:

**Shareholders' rights:** These include the acquisition and free sale of shares, exercising the right to vote as well as a participant's share in the corporate profit.

**Executive Board and Supervisory Board obligations:** They are obligated to comply with the interests of Steel Ltd. The Executive Board decides on the corporate strategy and has to regularly inform the Supervisory Board about the state of the corporate group. If the Executive Board decides on the corporate strategy, the Supervisory Board has to approve it.

**Remuneration:** The remuneration of the Executive Board members is determined by the Supervisory Board, whereas the Executive Board decides on the remuneration of the top corporate management executives.

**Transparency:** is not ensured if financial reports are not provided in a timely manner, at optimum every financial quarter.

Dear Sirs,  
 we are a worldwide operating logistics company and our special service is to inform our clients around the clock where their goods are. To be able to do this, we especially need the continuous and reliable contact to our drivers. Therefore we are looking for a tailored concept for our company. Should we find a common basis, we want to place a large scale order.

Please contact us if you are interested.

Best regards,  
 Peter Delroy

# Ability overview

## 1. Profile of Results

Norm group: (Post-) Graduates

## 2. Further Details

Numerical Reasoning (consumer)	average
<p>The task is to draw logical conclusions from complex numerical information. In addition, this test measures the ability to purposefully retrieve the relevant information from a large amount of data. High scores indicate the ability to accommodate complex information under time pressure fast and efficiently and to distinguish it from irrelevant information.</p>	
Performance	Compared to other participants, this candidate shows a capability to handle the tasks in this test effectively which is <b>average</b> .
Processing style	The completion of the test was <b>quite fast</b> but <b>inaccurate</b> , which means that the candidate completed approximately as many tasks as most other participants but, compared to other participants, she made more mistakes.

**sparks**

sparks

# What sparks measures

## Fluency

Addresses issues with determination and works quickly; is able to develop many ideas and alternative solutions to a problem

## Flexibility

Adapts to the new challenges; does not stop at the first solution, but finds others

## Originality

Does not let instructions' prerequisites restrict own thinking; follows own convictions; develops fresh ideas; makes unusual connections

## measurement of creativity

**Introduction**

In this test there are no correct or incorrect answers. Your results are based on the number, diversity, and originality of your ideas.

You may name the object using one or more words. Enter the name below the drawing area using your keyboard.

Now look at the shapes in the drawing area. In this example, the shapes in the drawing area might be glasses, binoculars, or a vehicle. You can be as imaginative as you like when creating and naming the objects.

Now name this object by clicking into the text field below the drawing area and entering some text.

After trying this out press the '>' button.

# shapes (management) Dimensions

Domain	Dimension	Definition
Interactive	directing	likes to be in charge; leads and directs others; keeps a team focused on objectives
	persuasive	enjoys selling and negotiating; finds it easy to persuade others; influences others and wins their support
	socially confident	comes across as confident and self-assured; feels at ease during presentations and formal events
	sociable	is talkative, lively and sociable; enjoys being in groups; entertains others and has a wide network of contacts
	agreeable	is team-oriented and considerate; enjoys working with others; is supportive and pleasant to be with
	behavioral	is interested in others' behavior; observes and analyzes others' motives and reactions
Operative	prudent	takes a broad perspective; considers the wider consequences of plans and activities
	focused on results	is pragmatic and target-oriented in approach; focuses on reaching results; solves problems quickly and effectively
	systematic	is systematic and well organized; defines clear priorities; plans well ahead and with realistic time-scales
	conscientious	takes care to follow procedures; respects rules and regulations; sees jobs through to the end and pays attention to quality issues
Intellectual	analytical	quickly grasps complex issues and problems; identifies the core of a problem; evaluates information thoroughly
	conceptual	enjoys working with concepts, models and strategies; likes intellectual challenges
	imaginative	can think out of the box; develops imaginative and original ideas and solutions
	open to change	supports new ideas; enjoys change and novelty; continually looks for ways to improve things
Emotional	autonomous	acts on own initiative; follows own direction; expresses own views and opinions freely
	achieving	sets self demanding targets; enjoys difficult challenges; wants to get ahead and succeed
	competitive	likes to compete against others; is determined to win; enjoys talking about own achievements
	energetic	shows drive and determination; takes an energetic approach to work; remains focused and in control under pressure

**snap-it**

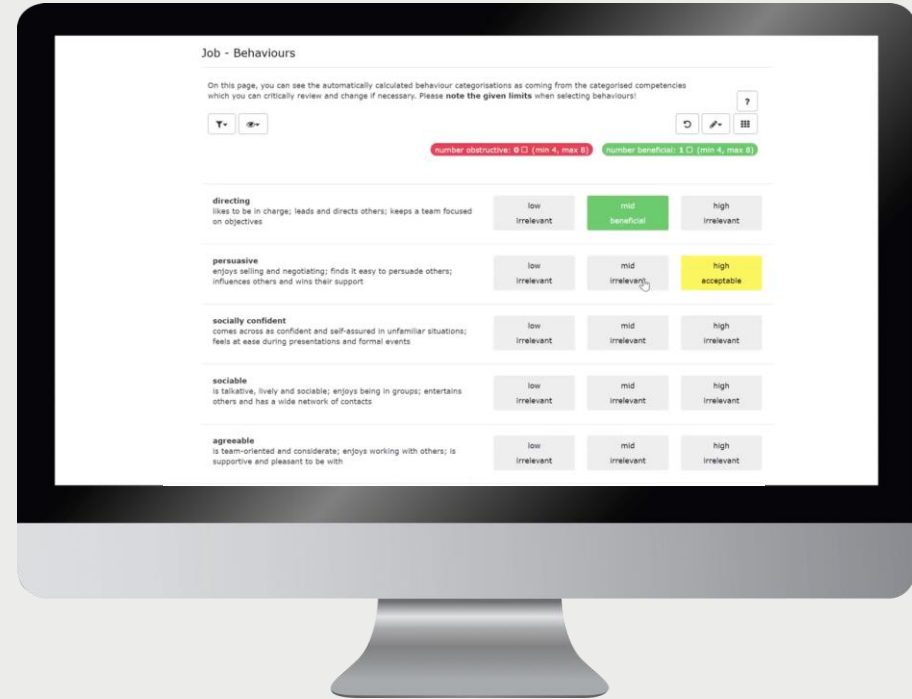

snap-it

# snap-it – specifying job requirements

## Adding value

*snap-it* enables you to make better job definitions, which means that the selection criteria are more linked to what is critical in the job.

*snap-it* automatically calculates the person/job fit and, as a result, the people selected are more likely to fit and be good at the relevant job. This is our aim: the right people for the job.

# What does snap-it do?

## snap-it

*snap-it* provides a detailed description of the job requirements as well as the necessary information to determine the fit of a person to these conditions.

# snap-it – adding value

## What are the benefits of *snap-it*?

Uses the validated *shapes* competency model and translates those essential competencies into behaviours

Presents results as overall job match score - as well as per competency

Increased user-friendliness

Generates an interview guide to probe essential competencies

Supports competency-based interviewing (CBI)

Enables standardised interview and selection processes, resulting in better hiring decisions

**squares**

squares

# squares – adding value

## Why should you use the *squares* integrity test?

### Online screening

It reduces the probability of counterproductive work behaviour and adds particular value to jobs where security and risk management play an important role.

### On-the-job development

Staff productivity can be significantly increased with targeted training measures based on the *squares* results.

### Corporate citizenship strategies

It can be used for teams, departments or entire companies to identify critical aspects and to provide an ideal starting point for corporate development processes.

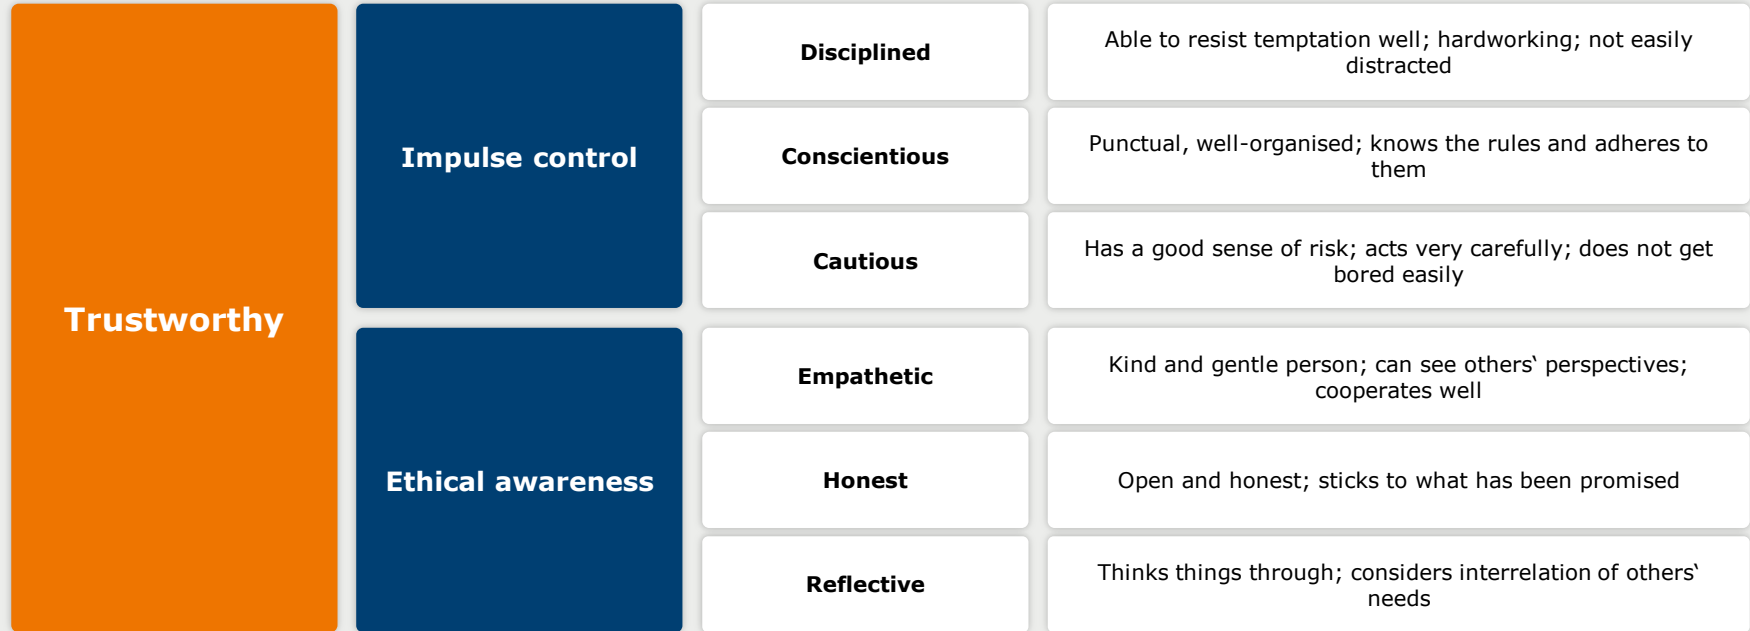

### Predicting tenure

It provides good insight into whether an employee is likely to stay in an organisation, thus reducing undesired fluctuation and recruitment costs.

### Safety

The safety report shows how safe, compliant and cautious some are. This can be used in selection or before shift start to keep people and property safe.

# squares – concept model

### How would you judge your behaviour in comparison to others?

Please click onto the bar in a spot that most accurately reflects your behaviour in comparison to the people around you. You can move the slider as you wish after clicking onto the bar.

 Data quality: Okay

## Introduction

This report is based on the results of the instrument squares. The squares safety report screens candidates for their fit to jobs and roles, where safety matters. The total safety score predicts the likelihood of a candidate being a dependable and safe employee. However, the squares scores provide probabilities and not certainties. The information provided can be supplemented by other assessments looking at the match to specific job requirements, and by a structured interview.

## Total Safety Score

The total safety score was derived from the candidate's responses and the calculated scores on the four safety factors (see below). These scores were then compared with scores from a selected group of people (norm group).

The squares instrument also assesses aspects of candidates' response patterns to ensure the accuracy of the resulting work safety score and its appropriate interpretation: In this case, the responses were mostly consistent, indicating a rather sincere response strategy or a stable self-perception. However, the test time is quite short, implying an inattentive style. Thus, the results may be less reliable in some parts and should be questioned in an interview.

## Safety Factors

The total safety score is derived from the candidate's scores across the four safety factors.

Safety Factors	Results				
<b>Caution</b> deliberately avoids potentially hazardous and risky behaviour at work			●		
<b>Compliance</b> strictly adherence to safety policies and instructions at work		●			
<b>Commitment</b> personal lifestyle (e.g. sober, rested) supports work performance		●			
<b>Composure</b> stays friendly to others under various degrees of stress			●		

poor limited fair good excellent

Feedback is at the discretion of the client. The squares safety report was designed to be used as a screening tool, and it may therefore not be necessary for all clients to provide feedback. The user assumes all liability for the disclosure of this information to other persons, including the candidate.

# **360° feedback**

**– development through structured feedback**

360°

# 360° feedback – development through structured feedback

## Adding value

360° feedback supports executives and managers in their professional development, as constructive feedback is a key factor in allowing managers to compare their own view of themselves with how other people see them.

With the 360° feedback system, cut-e allows you to administer and interpret multi-rater feedback processes online.

# shapes360 competency model

# Situational Judgement Questionnaire

SJQ

# SJQ – adding value

## Why should you use *SJQ*?

### Efficiency

Screen a high volume of candidates at an early stage of the process.

### Quality

Highly predictive of future performance.

### Engagement

Manage candidate expectations of the role with realistic job previews.

### Security

cut-e's unique scoring method generates a 'scoring' key that is hard to guess.

### Fairness

Negligible group differences found for *SJQs*, meaning that those completing the assessment are operating on a level playing field.

# chatAssess

# chatAssess – embedding assessment in instant messaging

*chatAssess* is a new customisable, psychometric communication game. This powerful situational judgement tool in the instant messaging style of WhatsApp or Facebook Messenger assesses a candidate's strengths, personality and abilities. *chatAssess* can be customised to suit any role, at any level, in any organisation.

# chatAssess – adding value

## What are the benefits of *chatAssess*?

### Quality

*chatAssess* takes the power of a custom-designed SJQ and embeds it into a real-time instant messaging simulation.

### Efficiency

*chatAssess* measures the strengths, personality and cognitive abilities required in any role, as well as a candidate's social skills, conscientiousness and their ability to organise themselves.

### Customisation

*chatAssess* is fully customisable to client branding.

### Engagement

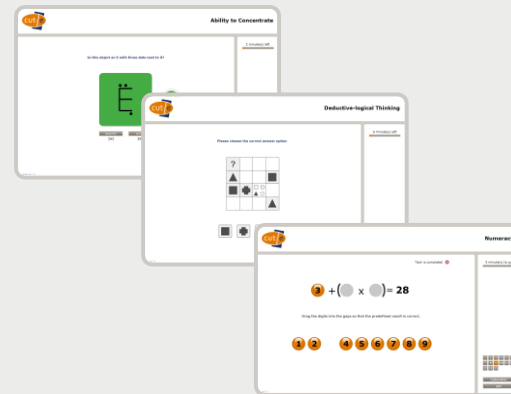

The familiar format of *chatAssess* as an instant messenger appeals to candidates who feel comfortable using it.

# playAssess

# playAssess

In the cover story, the test taker is introduced to an alien named Odd, who took over a building and settled at the top level. The candidate now has to take the elevator up to stop Odd. While doing so, he is challenged by Odd to complete several tests. Every time a test is completed, the elevator goes up a little further. After completing all tests, the candidate is rewarded by defeating Odd and sending him back to his home planet.

# How does playAssess work?

playAssess – adds fun and engaging context

Your customised online assessment

selected from

verbal/  
numerical  
aptitude

personality

Situational  
Judgement

creativity

integrity

values

# playAssess – adding value

## What are the benefits of *playAssess*?

### **Greater engagement:**

*playAssess* provides a fun and involving experience for a situation typically considered as stressful.

### **A unique assessment:**

Built from randomised questions, the presented assessment is different for each candidate.

### **Self-assessment:**

Invite potential applicants to work through the online assessments and receive feedback on their results.

### **Additional customisation:**

The test battery is created based on your needs. Also some elements of the cover story can be tweaked to your needs.

### **No experience needed:**

Candidates do not need to be good at gaming to perform well in the assessment, as they are not games.

### **Device-independent:**

We have optimised *playAssess* so that it can run on all types of devices.

# vidAssess

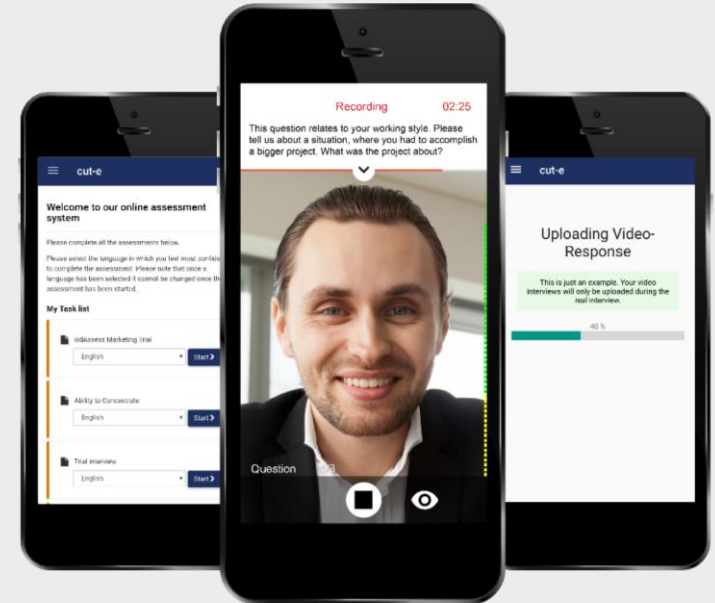

# vidAssess – competency-based video interviewing

## Adding value

*vidAssess* is our approach to enable competency-based video interviewing at a time when video interviewing has evolved to become an essential component in a competency-based recruitment process.

*vidAssess* provides a future-proofed and psychometrically-integrated recruiter and candidate experience.

# **effect**

- improving team effectiveness**

**effect**

# effect – improving team effectiveness

## Adding value

*effect* is a diagnostic tool based on the ground-breaking research of Professor Henning Bang of the University of Oslo in Norway.

In this research, Professor Bang identifies the key characteristics of effective management teams and the factors that influence and predict high performance.

Please evaluate the statements below.

Clear team purpose

1. All team members know what this management team is supposed to accomplish. 1 2 3 4 5 6 7 ?

2. The management team has a shared understanding of its purpose. 1 2 3 4 5 6 7 ?

3. We have agreed on a set of key deliverables from our management team. 1 2 3 4 5 6 7 ?

4. All team members know which topics and issues should be addressed by the management team and those that should not. 1 2 3 4 5 6 7 ?
